

DOUBLE PRIMED & LOOMSTATE ARTIST CANVAS

WAX CONVERTERS TEXTILES

ARTIST CANVAS RANGE

DESCRIPTION

Double-Primed Artist Canvas is coated with an acrylic base formulation to ensure maximum protection against any traces of harmful impurities that may develop over the years as a result of ageing. To achieve this, a neutralising agent is included to absorb any traces of acidic compounds. The whiteness of the canvas is enhanced by the use of Titanium Dioxide pigment of the highest purity. The material analysis of this pigment serves as a guarantee that it is free of any by-products that could affect the long-term durability of the cotton base.

Product	Weave	Base Fabric	Finish	Roll Width	Nominal Weight
AC10	Dehrsutie	100% Cotton	White Double Primed	183cm	425g/sqm
ART12	Plain	100% Cotton	White Double Primed	200cm	480g/sqm
