IF IT'S NOT DOCRIL, IT'S JUST FABRIC!

For 20 years, Docril has been Australia's number one choice for outdoor awnings. The collection combines superior performance with a comprehensive range of colours and designs to provide a perfect solution for solar protection.

Docril is manufactured by the world renowned textile pioneer, Citel based in Spain. Since 1875, Citel have been the benchmark for outdoor technical fabrics. Their state-of-the-art facility is vertically integrated, controlling the entire process from spinning through to finishing. Citel has a deserved reputation for innovation and stringent quality control. Simply put, Docril is engineered to last.

- Docril is woven using 100% solution-dyed acrylic. A resilient yarn that is colour-fast and will perform for years under the harsh Australian elements.
- Not only does Docril provide protection from ultra-violet radiation, it regulates temperature to provide outdoor comfort and indoor climate control.
- Docril is a stylish fabric available in a comprehensive selection of colours, textures, and stripes.
- Docril fabrics are finished with a treatment which provides water repellency and ease of cleaning.

THE DOCRIL DIFFERENCE

FULL 10-YEAR UV WARRANTY

Docril is a premium quality fabric that is supported with a full 10-year UV warranty. Engineered to last in direct sunlight, performance is paramount without compromise.

100% SOLUTION-DYED ACRYLIC

Docril is engineered with a resilient solution-dyed acrylic yarn. This technology provides exceptional colour stability, durability and performance under the harsh Australian elements. Using the solution dying method, the colour becomes an integral part of the yarn through to the core.

UV STABILISED

Docril fabrics are UV stabilised which prevents them from fading under intense UV rays. This also increases the textiles' longevity and ensures easy cleaning.

DURABLE & EASY TO MAINTAIN

Docril fabrics are as durable as they are stylish and are designed to handle high traffic applications with ease. In outdoor situations these fabrics should be hosed regularly to remove dust, bird droppings and other solid particles and should not be rolled up or stowed away, while wet. Comprehensive care details are available on the Ricky Richards website or by request from Ricky Richards (Sales) P/L.

TRADITIONAL YARN-DYED ACRYLIC

Colour only penetrates the outside of the fibre

DOCRIL SOLUTION-DYED ACRYLIC YARN

Colour is consistent throughout the fibre
