INDUSTRIAL MESH

Our Industrial Mesh fabrics provide a breathable solution for protective coverings where both airflow and visibility are important. Commonly used in transport covers, agricultural applications, storage systems and recreational gear, these mesh fabrics offer strong tear resistance and dependable UV stability.

MAXISCREEN

VERSATILITY AT ITS FINEST

Maxiscreen can do it all.

Suitable for a variety of applications, Maxiscreen is a PVC coated mesh fabric that provides protection but still allows air to flow through. Engineered to be durable and versatile, Maxiscreen can be used for truck tarpaulins, small shade structures, tent and annexe windows, privacy screens, boat windscreens, and more.

UV STABILISED

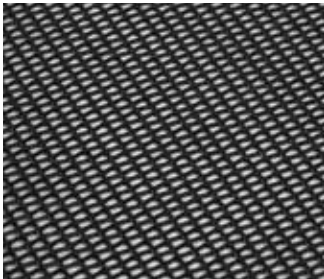

Maxiscreen mesh is UV stabilised which prevents it from fading under intense UV rays. This also increases the textiles' longevity and ensures easy cleaning.

MADE BY PHIFER®

Maxiscreen is manufactured by the global leader of solar control fabrics, Phifer®. The world's best!

MADE TO BREATHE, BUILT TO LAST

Megascreen provides superior ventilation with 20% openness, reducing wind resistance while maintaining long-lasting protection. It is UV stabilised, ensuring long-lasting performance even in harsh outdoor conditions. Designed for strength without bulk, Megascreen offers a high strength-to-weight ratio for easy handling and maximum durability.

5-YEAR UV WARRANTY

Megascreen is supported by a 5-year UV warranty.

MADE BY PHIFER®

Megascreen is manufactured by the global leader of solar control fabrics, Phifer Incorporated.

UV STABILISED

Megascreen mesh is UV stabilised which prevents it from fading under intense UV rays. This also increases the textiles' longevity and ensures easy cleaning.

HIGH STRENGTH TO WEIGHT RATIO

Megascreen is engineered to be robust and durable, capable of withstanding the demands of many applications.

REACH COMPLIANT

Megascreen is REACH compliant. REACH regulations were created to improve the environment and protect human health. REACH addresses the risks associated with chemicals and promotes alternative methods for the hazard assessment of substances.
